

UV SYSTEMS JUST GOT A WHOLE LOT SMARTER

LUMINOR's Information Monitoring Application

Whether you're a homeowner wanting to check the status of your UV system at the cottage, or the Superintendent of a school board monitoring the status of 10 different UV systems, LUMINOR's **UV CONCIERGE** is your go-to solution!

Product Features

- Integrated WIFI solution for WEB, ANDROID, and iOS
- Interactive interface matches current UV display for brand recognition
- Easy set-up and login
- Data logging capabilities (i.e. UV output over time)
- Safe & protected, cloud-based data management
- Monitor just one system, or ALL the systems that you may service
- FCC compliance
- SMS & email notifications
- Works on any new BLACKCOMB 5.1 & 6.1 systems

TRACK, MONITOR & SERVICE UNLIKE EVER BEFORE

LUMINOR's Fully Customizable Dealer Portal

LUMINOR is pleased to introduce its all new and industry first IOT platform with dealer reporting capabilities. You can now monitor ALL the UV systems that you service and get real-time reporting on system status. You'll know what systems are in immediate need of service, and what systems are in need of pending service. With the ability to sort this information under a variety of parameters, this Dealer Module is basically a self-contained Business Platform. Fully customizable for your specific business, LUMINOR's Dealer Portal is a business unto itself.

This is the only product of its kind in the UV space. It does not get any simpler than this!

Product Features

- Subscription based service based on the number of users that are under your "Dealer Umbrella"
- Each user is classified as an installed unit with an installed IoT module (whether currently online or not)
- Search under numerous conditions to narrow down potential trouble spots and to plan a service route
- Customizable software allows you to receive as many, or as few, SMS/email messages from these installed systems sent to up to 10 different mobile numbers or email addresses
